ABARVA · MOVES · EXPERT KERNEL

Costed business-case pack

Fraud Detection Enhancement

Tenant: First Capital Financial

Tenant key: first-capital

Move ref: first-capital:move:FC-FRAUD-2026

Generated: 2026-05-20

The full Design & Plan business case: costed roadmap, value-and-effort profile and the human+agent RACI, in CFO-readable prose.

Every figure in this document is produced by the Moves Expert Kernel from the tenant's audited substrate. Absent data is declared a seed gap, never invented. Effort rests on a researched planning rate card — a market range, not a quote. Generated by AbarVa · Moves.

Design & Plan — costed business-case pack

Fraud Detection Enhancement · first-capital

Verdict: SHAPE — do not fund as-is

The critic raised 1 blocker(s) — fund only once they are resolved. Re-shape the Move to close them.

Investment & return

Investment (costed roadmap)	$1,587,595 – $2,614,863 (base $1,867,759)
Net return	-$1,312,023 – $3,334,245 (base $1,244,581)
Payback	Not monetisable — the value rests on a baseline seed gap, so the kernel returns no payback rather than a fabricated one.

Costed roadmap — per-phase

Phase	Investment	Annual value	Foundational
Phase 0 — Data & model platform foundation	$232,608	$0	yes
Phase 1 — Detection-model build on card fraud	$1,024,262	$466,851	no
Phase 2 — Disposition automation + process redesign	$117,289	$311,234	no
Phase 3 — Adoption + run	$493,601	$259,362	no

Three-scenario sensitivity

Scenario	Investment	Net return	ROI
Base	$1,867,759	$1,244,581	Not recorded — seed gap
Conservative	$2,614,863	-$1,312,023	Not recorded — seed gap
Upside	$1,587,595	$3,334,245	Not recorded — seed gap

The case breaks if the baseline seed gap is not closed — without the missing unit economics the value range is a proxy, not a forecast.

Downside read: The conservative case cannot be expressed in hard dollars — the value rests on a seed-gap proxy. Close the baseline gap before reading the downside as a number.

Human + agent RACI

Decision	Kind	Accountable
Approve funding for the Move	governance	James Park (CRO, Executive Sponsor)
Select the detection-model architecture	design	Solution Architect
Clear model-risk governance + OCC MRA control review	governance	James Park (CRO, Executive Sponsor)
Execute the detection-model build	delivery	David Chen (Risk Technology, Program Manager)
Approve expansion from card to real-time payment fraud	governance	James Park (CRO, Executive Sponsor)
Own the disposition-automation and analyst change plan	delivery	David Chen (Risk Technology, Program Manager)

Surfaced flags

- [critic/blocker] Value cannot be monetised to a hard dollar figure — the gross value range rests on a seed-gap proxy. The CFO will not approve a fabricated return; the case must close the baseline gap first.
- [critic/concern] Downside net value (1302840) is below conservative effort (2614863.13) — in the pessimistic case the Move does not pay back. The CFO will ask what protects the floor.
-

[critic/concern] 3 baseline metric(s) are seed gaps (coverage 73%): Fraud-analyst FTE cost basis, Fraud alert volume / cost-per-alert, False-positive operational cost. The case is grounded only on what is recorded.

- [critic/concern] 3 of the top-3 case-moving assumptions stand in for absent tenant data (alert_volume, false_positive_cost, fraud_analyst_fte_cost). Validating these is the highest-leverage next step.
