

# Lakeshore Enterprise Finance & Treasury Modernization: Kyriba Rollout, Corporate Controls, Reporting Rationalization, Vendor Optimization & Value Realization

## Lakeshore Enterprise Finance & Treasury Modernization: Kyriba Rollout, Corporate Controls, Reporting Rationalization, Vendor Optimization & Value Realization

- A Discover brief produced by the Moves Expert Kernel for this Move. The section structure is inherited from the curated Domain Function Pack; every figure is the kernel's — the baseline is the real recorded / seed-gapped split, unrecorded metrics are named seed gaps, and the verdict is the kernel's real recommendation, never invented.

### NO-GO — Discover cannot honestly advance this Move.

- Base-case net return is not positive — the Move does not pay back on current assumptions.
- Baseline: 4 of 12 Function-Pack operating metrics are recorded by this Move (coverage 33%). The remaining 8 are precise, named seed gaps — not fabricated values.
- Assumptions: 13 named assumptions derived from the Function Pack (haircut factors, value narrative, evidence anchors, pain themes); 12 are seed-gap proxies owned by a "to be confirmed with the tenant" placeholder — no human owner is fabricated.
- Value: the gross value range is built from the Function Pack's curated value benchmarks — labelled planning ranges, NOT this tenant's own measured unit economics. It is carried as a proxy, so the kernel honestly blocks a claimable dollar payback until the tenant's spend base and the seed-gapped metrics are supplied.
- Value: 8 operating metric(s) needed to ground the forecast are seed-gapped — the value range is a planning proxy, not a forecast, until they are closed.

### This brief inherits the curated Finance, treasury & ALM Discover outline — 7 sections, structure not improvised.

- This Discover Brief inherits the curated Finance, treasury & ALM Discover outline from the bound Domain Function Pack. The agent does not improvise the structure — every section below is a curated, function-calibrated heading.

| # | Section heading                                    | Curated guidance                                             |

## Baseline coverage is 33% — 4 metrics measured and sourced, 8 declared seed gaps, none guessed.

- Baseline coverage is 33% — 4 metrics are measured, sourced and dated; 8 are declared seed gaps. Every recorded metric carries a source and a confidence; no missing metric is left blank.
- The recorded arc is the share of the metrics this Move needs that are actually measured; the remainder are declared seed gaps.

| Metric                                             | Value                              | Source                                                   | As of      |
|----------------------------------------------------|------------------------------------|----------------------------------------------------------|------------|
| Cost of funds                                      | 4.6 percent (blended)              | Debt & FX exposure (treasury_kyriba)                     | 2026-03-31 |
| Return on equity (ROE)                             | 11.8 percent (EBITDA margin proxy) | Revenue & cost baseline (finance_performance)            | 2026-03-31 |
| Financial-forecast accuracy                        | 78 percent (forecast vs actual)    | FP&A reconciliation (Lakeshore enterprise context load V | 2026-05-31 |
| Planning and close cycle time                      | 8.5 business days to close         | Month-end close baseline (operations_business_process)   | 2026-05-31 |
| Net interest margin (NIM) Seed gap                 | Not recorded                       | "Net interest margin (NIM)" is not recorded — this       | none       |
| Liquidity coverage ratio (LCR) Seed gap            | Not recorded                       | "Liquidity coverage ratio (LCR)" is not recorded —       | none       |
| Net stable funding ratio (NSFR) Seed gap           | Not recorded                       | "Net stable funding ratio (NSFR)" is not recorded        | none       |
| Economic-value-of-equity rate sensitivity Seed gap | Not recorded                       | "Economic-value-of-equity rate sensitivity" is not       | none       |
| Net-interest-income rate sensitivity Seed gap      | Not recorded                       | "Net-interest-income rate sensitivity" is not reco       | none       |
| Loan-to-deposit ratio Seed gap                     | Not recorded                       | "Loan-to-deposit ratio" is not recorded — this fun       | none       |
| Deposit beta Seed gap                              | Not recorded                       | "Deposit beta" is not recorded — this function exp       | none       |
| Common equity tier 1 (CET1) capital ratio Seed gap | Not recorded                       | "Common equity tier 1 (CET1) capital ratio" is not       | none       |

## There is real value here — but it can only be stated directionally until the monetisation inputs land.

- The pain themes below are the curated failure modes the kernel tracks for this function. The value is genuine — but with the monetisation inputs missing it can only be stated directionally, never as a dollar figure.
- The band has no dollar axis — it is a directional read of where value is likely to sit, not a sized estimate.
- Downside net value (61.03) is below conservative effort (8561401.32) — in the pessimistic case the Move does not pay back. The CFO will ask what protects the floor.
- 3 of the top-3 case-moving assumptions stand in for absent tenant data (baseline\_coverage\_gap, haircut\_0\_rate\_environment\_and\_macro, haircut\_1\_regulatory\_floors\_and\_risk). Validating these is the highest-leverage next step.
- The effort and cost are a planning range derived from the Function Pack archetypes and a researched benchmark rate card — not a quote; a client-specific estimate is required before funding.
- The 8 open seed gaps bound how a pilot can be scoped — the solution space narrows until the named metrics land.
- The opportunity for Lakeshore Enterprise Finance & Treasury Modernization: Kyriba Rollout, Corporate Controls, Reporting Rationalization, Vendor Optimization & Value Realization rests on the Function Pack's curated value benchmarks — labelled planning ranges, not this tenant's own measured economics. Until the seed-gapped monetisation metrics close, the kernel honestly carries the opportunity as a directional read, never a claimable dollar figure.

## 8 expected operating metrics are an open seed gap — closing them is the work that turns this Discover into a fundable Charter.

- 8 expected operating metrics are an open seed gap. Closing them is the work that converts this Discover into a fundable Charter case — each gap below is named with its source.
- The queue is sorted by decision impact — the widest bar is the next evidence ask. Every gap is a curated, expected metric.

| Open evidence gap                                  | Why it is a gap                                    | Expected data source                                      |
|----------------------------------------------------|----------------------------------------------------|-----------------------------------------------------------|
| Net interest margin (NIM) Seed gap                 | "Net interest margin (NIM)" is not recorded — this | The general ledger and the ALM system, reconciling inte   |
| Liquidity coverage ratio (LCR) Seed gap            | "Liquidity coverage ratio (LCR)" is not recorded — | The liquidity-risk and regulatory-reporting systems, comp |

| Common equity tier 1 (CET1) capital ratio Seed gap | "Common equity tier 1 (CET1) capital ratio" is not | The capital and regulatory-reporting systems, computing   |

## NO-GO — Discover cannot honestly advance this Move.

- Base-case net return is not positive — the Move does not pay back on current assumptions.
- Close the "Net interest margin (NIM)" seed gap — it gates honest sizing.
- Close the "Liquidity coverage ratio (LCR)" seed gap — it gates honest sizing.
- Close the "Net stable funding ratio (NSFR)" seed gap — it gates honest sizing.
- Close the "Economic-value-of-equity rate sensitivity" seed gap — it gates honest sizing.
- Close the "Net-interest-income rate sensitivity" seed gap — it gates honest sizing.
- Close the "Loan-to-deposit ratio" seed gap — it gates honest sizing.
- Close the "Deposit beta" seed gap — it gates honest sizing.
- Close the "Common equity tier 1 (CET1) capital ratio" seed gap — it gates honest sizing.
- Value cannot be monetised to a hard dollar figure — the gross value range rests on a seed-gap proxy. The CFO will not approve a fabricated return; the case must close the baseline gap first.
- 8 baseline metric(s) are seed gaps (coverage 33%): Net interest margin (NIM), Liquidity coverage ratio (LCR), Net stable funding ratio (NSFR), Economic-value-of-equity rate sensitivity, Net-interest-income rate sensitivity, Loan-to-deposit ratio, Deposit beta, Common equity tier 1 (CET1) capital ratio. The case is grounded only on what is recorded.
