

Current denial workflow

Synthetic — not real data — AbarVa demo

Invented administrative process from submission to final cash disposition

Invented feedback delay: 23 days. Trailing year: 618,000 original submissions; 97,942 first denials; 83,250.70 rework hours. Days in accounts receivable: 58.

Observed gaps in the fictional workshop: service-date versions are missing; manual reason mapping lacks a shared routing rule; recovery receipts lack a reconciled original-claim link. These are proposed causes, not accepted findings.

Sources: 02-denials-baseline.xlsx, 04-source-system-inventory.xlsx and 05-interview-notes.md. The diagram describes the invented current process; the proposed future design is not deployed.
