

Workday Finance HCM SaaS and Services

Synthetic contract document - CF-003 - page 1

Agreement Overview

Workday Inc. and Meridian Health enter this synthetic executed agreement for Workday Finance HCM SaaS and Services. Workday provides Meridian's finance and workforce SaaS platform, subscription modules, integration support, release-management advisory, and selected optimization services. The agreement includes named enterprise modules, worker and financial seat entitlements, premium support, integration capacity, and transformation advisory hours. The optimization question is whether Meridian can remove shelfware, reduce underused Extend and Prism capacity, claim service-performance credits where available, cap renewal uplift, and convert loosely scoped advisory work into outcome-bound work packages. The scope is intentionally limited to named services, platforms, operating responsibilities, and approved order forms.

Scope And Service Responsibilities

The supplier is responsible for the services listed in the scope schedule: Workday Financials; Workday HCM; Adaptive Planning; Prism Analytics; Workday Extend. Meridian retains ownership of business process decisions, user access approvals, clinical and financial data definitions, and finance value confirmation. Service changes require a written amendment, SOW, or order form linked to CF-003.

Commercial Terms And Pricing Schedule

Annual contract value is USD 12500000. Pricing includes subscriptions, managed-service towers, support capacity, and approved change capacity. Invoices must map to an active PO, a covered service period, a current rate-card or subscription line, and the executed contract scope. Credits, taxes, and pass-throughs require line-level visibility.

Service Levels, Renewal, And Value Confirmation

Service levels include availability, severity response, resolution, backlog aging, and monthly service review obligations. The notice deadline is 2027-09-30; auto-renew is Yes. Recoverable leakage, avoided cost, negotiated improvement, and realized value are separate ledgers. Realized value requires finance confirmation and cannot be inferred from opportunity size.
